# SIZE RELATED INFORMATION

- Standard height from last landing is 14 feet + Room for machine
- Minimum customized height is 10 feet, where the cabin height is reduced to 6 feet.
- Standard Pit depth from the bottom landing level is 6 feet
- Minimum height is 1 and half feet.
- If in case, pit is not possible then there will be 3 steps with a total height of 1 and half feet from the ground level.
- At top of the shaft, it is always recommended to keep the machine on a 8 inch slab.
- A room if provided to the machine, can be accessed by a third person in case of any emergency..
- In case if there is no shaft, we will create a self supported structure through a third party and the machine will be kept within the same structure at top of the shaft.
- All Bharat Elevators and Cube Elevators can be wall mounted.
- Per passenger we are supposed to provide minimum of 1.8 sqft and maximum of 2 sqft.
- From 1 passenger to 4 passenger a minimum capacity of 272 kgs will be provided and for more than 4 passengers, power consumption will increase by 1 Kw for every 2 passengers.
- Bharat Elevators comes with multiple sizes as follows.

1 Passenger - 3 feet by 3 and half feet  
Cabin size 2 feet by 1 feet
